

# InnPower's Annual Vegetation Management program begins in February

This year our contractor, Ontario Line Clearing & Tree Service, will be focusing on Cycle 1. If you live in this area, please be aware that Utility Arborists may be in your neighbourhood.

## Our Program

With safety and reliability in mind, we take a proactive approach to vegetation management. Our service territory is broken up into 4 cycles. Every year, one cycle is completed, ensuring regular preventative maintenance.

## Purpose

Trees and other vegetation around powerlines can cause outages and create safety hazards. We follow recognized practices and clearance requirements to maintain the health/appearance of trees while lowering risk to our power supply.

***For more information on vegetation management, visit [www.innpower.ca](http://www.innpower.ca).***

# 2024 Cost of Service Application

Local distribution companies (LDCs) such as InnPower, are funded by the distribution rates included in the delivery charge paid by customers. These rates are approved by the Ontario Energy Board through a **Cost of Service** (COS) Application.

The staff at InnPower are busy preparing our next Cost of Service application for distribution rates effective January 1, 2024.

While the COS process can be **complicated** and **lengthy**, **InnPower is dedicated to making it easier for customers** to understand and encouraging customer involvement through the process.

**Visit [www.innpower.ca](http://www.innpower.ca) for a breakdown of information including:**

- *InnPower and its Role in Electricity Distribution*
- *An Overview of InnPower Customer Bills*
- *InnPower's 2024 COS Rate Application*
- *The Ontario Energy Board and its role in the COS Application Process*

***Stay tuned for more resources  
and information on specific ways  
you can be involved with the  
COS process!***
